

CORES AND TUBES

T Series

Copely has the capability to manufacture a huge range of cores and tubes for numerous applications. Copely is also part of the COBA Plastics Group, which has won awards for consistent quality in production. Made in the UK – you can trust that the cores and tubes have been made from higher quality materials, under better conditions, and with superior workmanship to those imported from Asia. We partner with our OEM customers to ensure our tubing offers the best performance in its intended application.

Key Features:

- Tubing can be supplied in cut lengths or coils.
- Manufactured from a wide range of materials.
- Many standard tube sizes available – bespoke sizes available on request.
- Tubing manufactured using in-line laser measurement providing 100% goods inspection in-process.
- In-house tooling and design facility to suit customer applications.
- Production facility audited by a leading medical supplier.
- Medical grade extruded profiles available.

Materials:

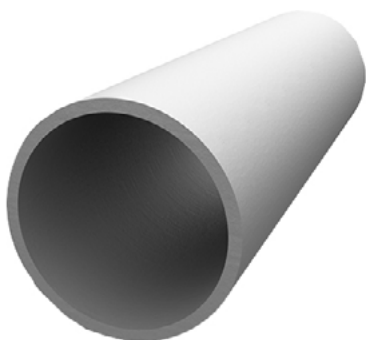

- PP (Polypropylene)
- LDPE
- HDPE (High-density polyethylene)

Sizes:

Available in 30 m coils

Colours:

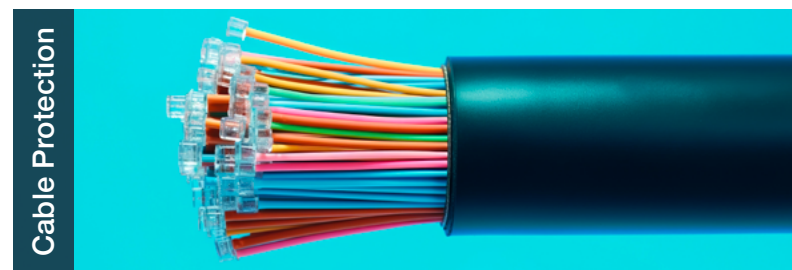

Standard: Transparent Green, White Helix
Also available in: Black, White Helix

Copely

1. Made from PP (Polypropylene) or LDPE or HDPE (High-density polyethylene)

Applications:

- Packaging - rigid cores for winding tape and bandages.
- Medical - tubing to suit various applications including urine drainage, suction, and needle-fork tubes.
- Other - rigid plastic cores for winding a wide range of material options.
- Caravan drainage
- High voltage cable protection
- Large scale food rollers
- General industrial
